AREA 32 ACRES

TENTHS OF MILE

DRURY POND

Temple, Franklin County
U.S.G.S. Farmington, Maine (7½')

Fishes

Brook trout
Yellow perch
Chain pickerel
Minnows
Golden shiner
Blacknose dace

Creek chub
White sucker
Redbreast sunfish
Pumpkinseed sunfish
American eel

Physical Characteristics

Area - 32 acres

Maximum depth - 20 feet

Principal fishery: Chain pickerel

Temperatures:

Surface - 74°F

18 feet - 52°F

Drury Pond is located west of Porter Hill. Its main inlet enters from nearby Mud Pond. The pond's outlet flows a short distance south into Temple Stream. Its shoreline is mostly undeveloped.

Water quality in Drury Pond is poor for coldwater gamefish. Water temperatures reach critically high levels at all depths during the warm summer months. The weedy shoreline provides good habitat for the warmwater fish species in the pond. The pond is not stocked.

Drury Pond is accessible via the Day Mountain Road. The pond is open under general law in both the summer and winter fishing seasons. See the lawbook for additional regulations.

Surveyed - August, 1957
